**Floor-Standing
Low-Speed Refrigerated Centrifuge**

LX-75L2400R

Floor-Standing Low-Speed Refrigerated Centrifuge

LX-75L2400R

Advanced Centrifugation Solutions for Modern Blood Banking

Step into a realm of unmatched convenience with the Haier Biomedical LX-75L2400R Blood Banking Centrifuge, tailored to exceed the demanding needs of blood bank centrifugation. Redefine efficiency as the LX-75L2400R effortlessly accommodates up to 16 x 500 ml blood bags or 6 x 2400 ml centrifuge bottles, delivering optimal sedimentation results with each run

Elevate your laboratory's capabilities with the LX-75L2400R's extensive rotor options, its formidable motor, and user-friendly control panel, all complemented by a robust refrigeration system and an array of versatile accessories

Crafted for excellence, the LX-75L2400R is the centrifuge of choice for blood banks and transfusion centers. Its superior design also finds extensive application in the forefront of biopharmaceuticals, cell therapy, biological culture, vaccine production, and academic research, making it a pivotal tool in diverse scientific fields

Excellent Performance

Unlock the full potential of your blood processing center with the LX-75L2400R's expansive capacity and cutting-edge selection of rotors, carriers, and adapters, masterfully designed to handle a diverse array of high-capacity applications. This powerhouse is the epitome of versatility, perfect for sophisticated bioprocessing, clinical diagnostics, and comprehensive blood sample preparation. It also serves as IVD laboratory equipment when used with IVD tubes and diagnostic analysis systems, separating human blood for hematological, immunological, and cardiovascular diagnostic tests.

Quiet yet powerful, the LX-75L2400R redefines operational convenience, setting a new standard in the industry. At its heart lies a microprocessor-controlled frequency motor, delivering robust torque and rapid acceleration, all while ensuring an extended motor lifespan. Achieve peak performance with speeds soaring up to 7,500 rpm and forces reaching 13,376 x g, propelling your research to new heights with unmatched precision and reliability.

Expansive Memory

Maximize efficiency with over 1000 program memories, ready to streamline your workflow

Rapid Cooling

Achieve 4°C in just 15 minutes from room temperature, speeding up your readiness

Quiet Operation

Work in peace with a sound design that keeps noise levels below 60 dB, even at maximum speed

Precise Control

Tailor your operations with 15 acceleration and 16 deceleration stages for unparalleled precision

Maintenance-Free Motor

Enjoy seamless operation with our brushless induction motor that requires no maintenance and ensures a clean lab environment

Stability

Trust in the stability of our low-center-of-gravity design for consistent performance and optimal centrifugal results

Ergonomic Design

Open the door

One-Touch Automation

Experience unparalleled convenience with our one-button automatic door mechanism that seamlessly opens and closes from front to back, ensuring quick and easy access while maintaining sterility standards.

Automated Rotor Lid Management

With our centrifuge, the rotor lid opens and closes automatically, complete with lid storage, reducing manual effort and enhancing workflow efficiency.

Intuitive 10-Inch Touch Screen

The expansive 10-inch touch screen interface provides operators with user-friendly navigation through settings and features, making operation straightforward and minimizing training time.

Electric Push Rod

Engineered for safety, the electric push rod offers smooth and controlled opening and closing of the centrifuge chamber, providing an extra layer of protection to users.

316 Stainless Steel Chamber

The premium 316 stainless steel construction of the centrifuge chamber ensures a rust-free and contaminant-resistant environment that is exceptionally easy to clean and maintain.

Versatile Rotor Capacity

Our centrifuge accommodates a variety of research needs with three rotors designed for 250ml, 500ml, 1000ml, 2000ml, and 2400ml centrifuge bottles, as well as 500ml blood bags, maximizing your laboratory's throughput capabilities.

Emergency Lid Release

The lid can be opened by utilizing the reset hole on the side plate. Rotate a 5mm hex key clockwise several times to open the lid.

Interactive 10-Inch LCD Touchscreen

Glove-Friendly and Ergonomic

The 45° angled, glove-friendly touchscreen offers a wide viewing angle, making it comfortable and practical for users of all heights

Enhanced Access Controls

Equipped with user login and password protection, ensuring individualized program data management for each user

Visibility and Monitoring

Enlarged track bar display of set and actual run conditions during centrifugation, ensuring clear visibility from a distance

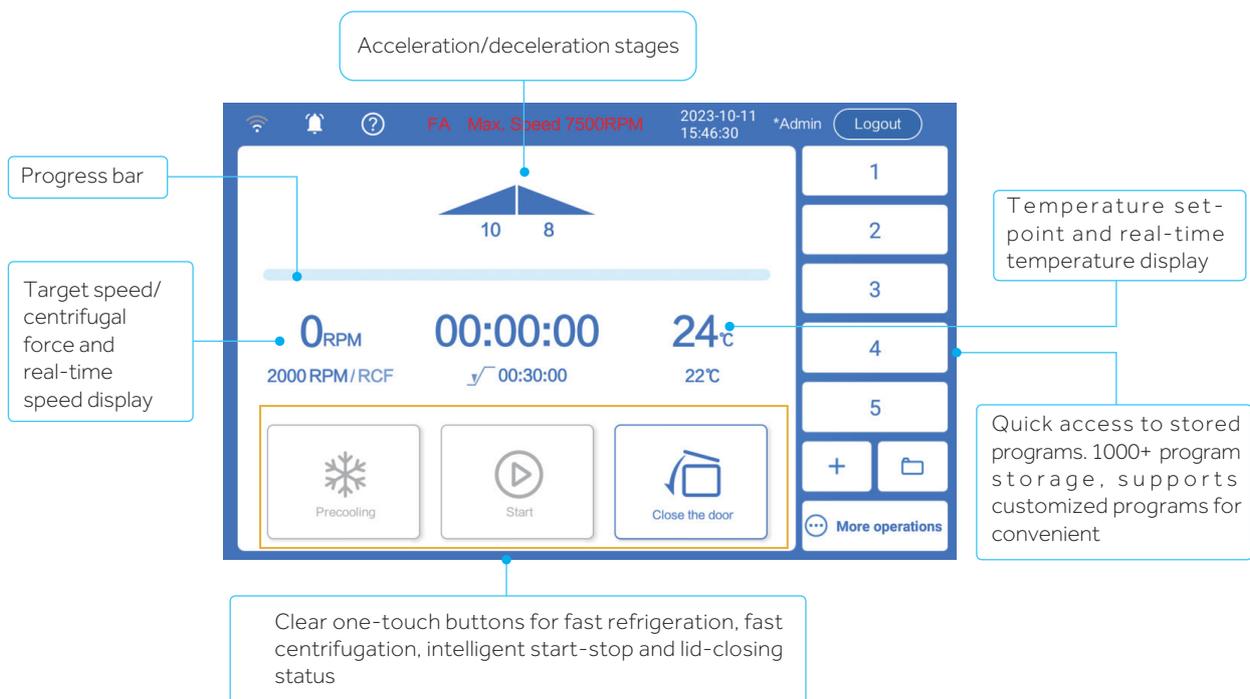

Program Recall and Efficiency

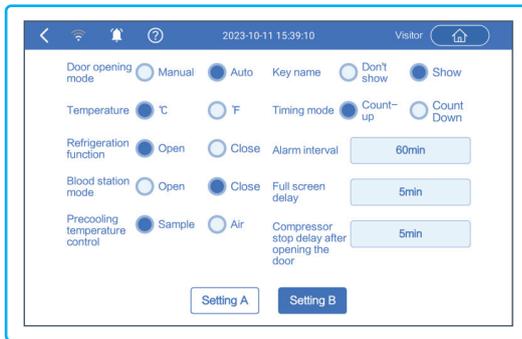

Quick recall feature for over 1000+ programs with alpha-numeric naming, minimizing time between runs and facilitating quick starts for routine users

Adjustable On-the-Fly

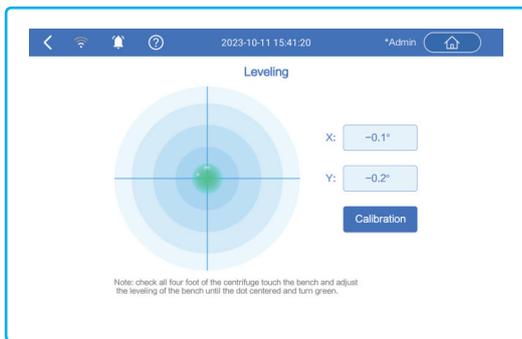

Users can alter speed, centrifugal force, time, and temperature during the centrifugation process for precise control

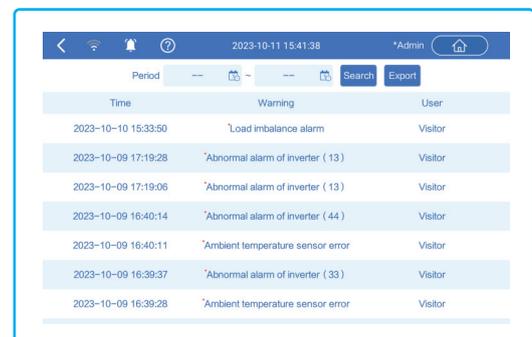

Multiple operation setting modes, including unique blood bank mode function, convenient for blood bank users to use

Multi-echelon program running mode, achieving continuous operation of multiple speed steps for special users

Electronic level assists in installation and leveling, making installation easier and simpler

The operation record including speed, time and temperature, operation curve with alarm messages etc. can be tracked on the screen and exported by USB port

Enhanced Safety

Immediate Imbalance Detection & Shutdown

Offers real-time loading imbalance detection with instant shutdown to protect against imbalances

Stable Installation

Φ120mm adjustable feet ensure the centrifuge is securely and stably installed in any setting

Comprehensive Alarm System

Features a multi-faceted alarm system for abnormal voltage, high temperature, overspeed, load imbalance, rotor absence, brake anomalies, and rotor life

Anti-Vibration Lid Lock

Prevents accidental opening during operation, ensuring sample integrity and operator safety

Robust Construction

Fully covered steel plate protective sleeve and a 12mm steel shell provide enhanced durability and user safety

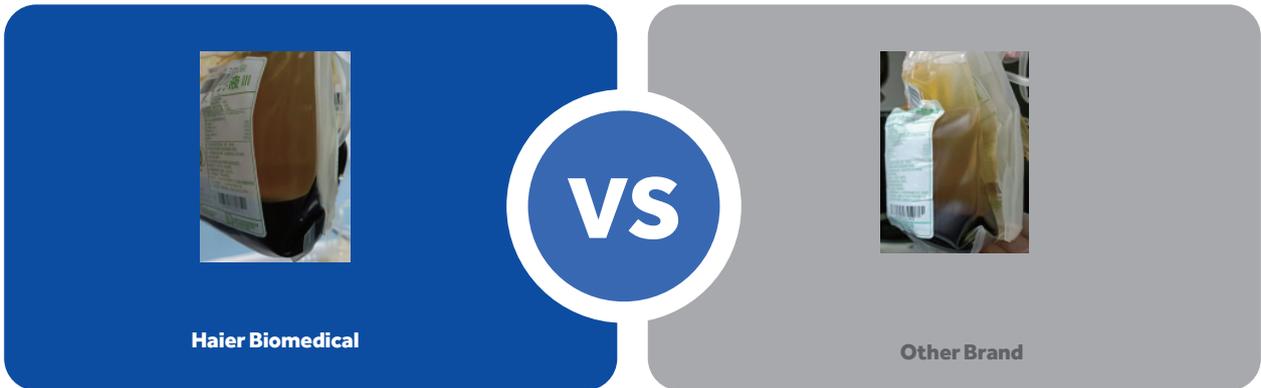

High-Quality Connectivity

Equipped with an imported 5-core aviation plug for easy, fast, and safe usage

 Real - World Efficacy

Blood Station User: Blood centrifugal test

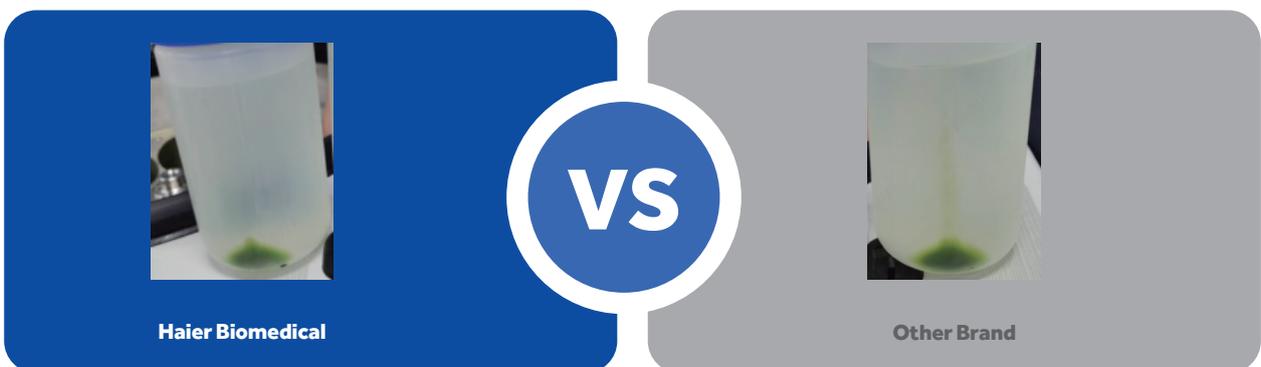

The image shows a comparison between two brands of blood centrifugal test results. On the left, a blue rounded rectangle contains a photograph of a Haier Biomedical blood bag with a distinct, clear layer of leukocytes. Below the photo is the text "Haier Biomedical". On the right, a grey rounded rectangle contains a photograph of a blood bag from another brand, showing a less distinct leukocyte layer. Below the photo is the text "Other Brand". A large white circle with "VS" in blue is positioned between the two photos.

Precision Layering

Clear Separation with Distinct Leukocyte Layer, Eliminating the Need for Re-Separation

Scientific Research User: Seaweed centrifugal test

The image shows a comparison between two brands of seaweed centrifugal test results. On the left, a blue rounded rectangle contains a photograph of a Haier Biomedical seaweed centrifuge tube showing a clear, distinct layer of seaweed at the bottom. Below the photo is the text "Haier Biomedical". On the right, a grey rounded rectangle contains a photograph of a seaweed centrifuge tube from another brand, showing a less distinct seaweed layer. Below the photo is the text "Other Brand". A large white circle with "VS" in blue is positioned between the two photos.

Optimal Centrifugation

Clear Layering, High Yield, and Zero Wall Adhesion

Technical Data

Model	LX-75L2400R
Maximum Capacity	8*2000ml* or 16*500ml blood bags
Max Speed (rpm)	7,500
Max RCF(xg)	13,376
Speed Accuracy (rpm)	±5
Time Setting Range	1min~99h59m59s (1-second increment)
Precooling Function	Yes
Temperature Setting Range (°C)	-20~40, adjustment increment: 1
Display	10 inch touch screen
Noise (dB(A))	≤60
Power Supply	3-400V 50/60Hz
Power (W)	6400
Exterior Dimensions (W*D*H)(mm)	900*1050*1020
Lid Opening Height (mm)	1780
Net Weight (kg)	620
Packing Dimensions (W*D*H)(mm)	1092*1279*1720
Gross Weight (kg)	750
Other Functions	Rotation speed/RCF switchover, inching operation, running process indicator, sound alert, adjustable acceleration/deceleration, user logging, user lock-out, automatic door opening, on-screen display for imbalance, over temperature, stainless steel chamber
Certification	CE

*Buckets for 2000ml centrifuge bottles can be customized depending on requirements.

02

Floor-Standing
Low-Speed Refrigerated Centrifuge

LX-60L1000R

NEW

LX-60L1000R

Floor-Standing Low-Speed Refrigerated Centrifuge

Scope of Application

Haier Biomedical LX-60L1000R Blood Banking Centrifuge seamlessly integrates a remarkably compact footprint with top-tier performance. It can handle up to 6×500ml blood bags at a time, providing excellent accuracy in speed and temperature control. It also serves as IVD laboratory equipment when used with IVD tubes and diagnostic analysis systems, separating human blood for hematological, immunological, and cardiovascular diagnostic tests.

Excellent Performance

Precision Control

Ensure excellent speed and temperature control accuracy, and maintain the integrity and consistency of samples in each centrifugation cycle, thus achieving high-quality blood treatment.

Rapid Cooling

The unique refrigeration technology enables rapid cooling. It achieves 4°C in just 10 minutes from room temperature under pre-cooling mode, offering impressive time savings.

Expansive Memory

Maximize efficiency with over 1000 program memories, enabling the streamlining of the workflow.

Automated Door Management

With one-touch automatic door opening as a standard feature, optional automatic door opening/closing functionality is also available

Quick-Lock Rotor Exchange

Patented tool-free rotor exchange technology enables the installation and removal of rotors on the centrifuge automatically and securely without the need for tools.

Quiet Operation

The sound design is optimized for low noise levels ($\leq 54\text{dB(A)}$).

Ergonomic Design

A space-efficient rotor lid storage design

Optional electric push rod offer smooth and controlled opening and closing of the centrifuge door

7-inch touch screen interface for convenient operation

Quick rotor exchange design for installation and removal with no tools required

316 stainless steel centrifuge chamber is rust-free and easy to clean

USB port for exporting operation records, including data on speed, time, temperature, operation curves, and alarm messages

Emergency lid release: Pry out the side - plate's white plug with a tool and pull the release cord 7+ times to open the lid

Intuitive Interface

Large, bright, interactive 7-inch LCD interface offers:

The 45 ° angled, glove-compatible touchscreen provides a wide viewing angle for easy visibility and comfortable use by technicians of all heights.

Advanced user settings and password protection ensure safe operation. Multiple user profiles can be created to customize access and settings, improving workflow and sample safety.

During operation, the display of settings and actual operating conditions can be easily monitored through the enlarged tracking bar, so as to obtain a clear vision and ensure that the operator can see them from a distance.

Store more than 1,000 programs, and can directly access 5 or 10 commonly used programs, depending on the model. Programs can be named alphanumerically, ensuring easy identification and selection, minimizing the risk of errors during operation.

Users can change the speed, centrifugal force, time and temperature during the centrifugation.

Intuitive Interface

15 Acceleration/16 Deceleration stages

Temperature set-point and real-time temperature display

Quick access to stored programs. 1000+ program storage, supports customized programs for convenient

Clear one-touch buttons for fast refrigeration, fast centrifugation, intelligent start-stop and lid-closing status

Progress bar

Target speed/centrifugal force and real-time speed display

Multiple operation setting modes, including unique blood bank mode function, convenient for blood bank users to use.

Settings menu including: Door opening mode (Manual/Auto), Temperature (°C/°F), Refrigeration function (Open/Close), Blood station mode (Open/Close), Precooling temperature control (Sample/Air), Key name (Don't show/Show), Timing mode (Count-up/Count Down), Alarm Interval (60min), Full screen delay (5min), Compressor stop delay after opening the door (5min). Buttons for Setting A and Setting B.

Electronic level assists in installation and leveling, making installation easier and simpler.

Leveling interface showing X: -0.1" and Y: -0.2" with a Calibration button. Note: check all four feet of the centrifuge touch the bench and adjust the leveling of the bench until the dot centered and turn green.

Multi-echelon program running mode, achieving continuous operation of multiple speed steps for special users

Multi-echelon program running mode showing a speed curve graph with three steps (1, 2, 3) and a program list on the right.

The operation record including speed, time and temperature, operation curve, alarm messages etc. can be tracked on the screen and exported by USB port.

Enhanced Safety

Automatic radio - frequency rotor identification (RFID) enables immediate identification of a rotor once it is securely placed in the centrifuge chamber, avoids over-speed, reduces error messages, and enhances the safety.

Real time loading imbalance detection and intelligent lid locking monitoring, immediate shutdown protection in case of imbalance or lid opening.

Use of brushless induction motors to provide maintenance-free operation, eliminating carbon particle emissions.

Multiple alarms including abnormal voltage alarm, high temperature alarm, overspeed alarm, load imbalance alarm, rotor absent alarm, brake abnormal alarm, rotor life reminder alarm, and other alarm functions can effectively ensure the safety of the centrifuge.

A triple - layer construction paired with a fully covered steel plate protective sleeve provides an effective safeguard.

Specifications

Model	LX-60L1000R

03

Floor-Standing Highspeed Refrigerated Centrifuge

LX-210L750R

NEW

LX-210L750R

Floor-Standing Highspeed Refrigerated Centrifuge

Scope of Application

Haier Biomedical LX-210L750R is a floor-standing highspeed refrigerated centrifuge features with 3L capacity and performance up to 47,400 xg, which is ideal for all-purpose use in the industrial and research sectors.

It also serves as IVD laboratory equipment when used with IVD tubes and diagnostic analysis systems, separating human blood for hematological, immunological, and cardiovascular diagnostic tests.

Product Features

Offering a broad portfolio of fixed-angle and swing-out rotors, which can accommodate tubes and bottles from 1.5 ml to 750 ml, as well as deep-well plates

Automatic radio-frequency rotor identification (RFID) that enables immediate identification of a rotor once it is securely placed in the centrifuge chamber, avoid over-speed, reduce error messages, and enhance the safety

Low center of gravity design, amplitude less than 0.02mm, ensuring stable operation and good centrifugal effect

Use of brushless induction motors to provide maintenance-free operation, eliminating carbon particle emissions

High-strength, aero-aluminum rotor, which is acid and alkali corrosion-resistant, greatly increases the service life, and allows for 50,000 uses

Optimized multi-layer shock absorption technology makes the sound level ≤ 56 (dB(A))

Product Parts

Dual self-lock design to ensure safe operation

Dual gas springs with safety protection

4 universal casters and 4 levelling feet allows for easy movement and locks safely into place

316 stainless steel centrifuge chamber is rust-free and easy to clean

USB port for exporting operation record including speed, time and temperature, operation curve with alarm messages etc

- Patented tool-free rotor exchange technology enables the installation and removal of rotors on the centrifuge automatically and securely without the need for an tools
- Pull the handle to quickly remove and install the rotor

Triple-layer construction to ensure safe use

Intuitive Interface

The 7-inch 45 ° glove-friendly touchscreen, the wide viewing angle more comfortable and practical for users of all heights

Further enhanced with access controls such as user login with password protection, the independent program data of each user is managed separately

Easily monitor the display of set and actual run conditions with enlarged track bar during the run for clear visibility, which ensures the operator can see them from a distance

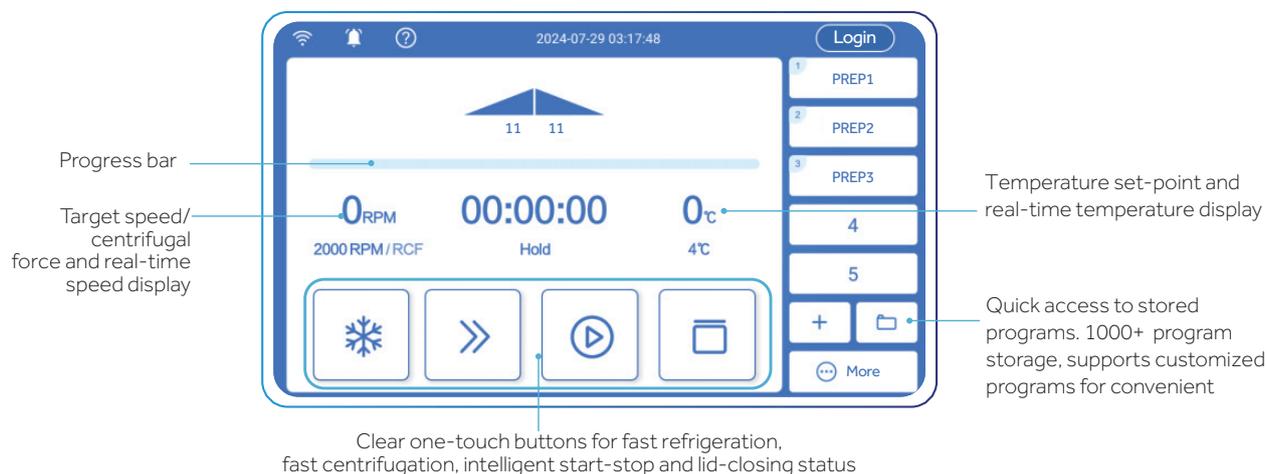

Quick recall of up to 1000+ programs with alpha-numeric naming to minimize time between runs and for quick run start by routine users

The speed, centrifugal force, time and temperature can be changed by user during the centrifugation process

11 acceleration + 12 deceleration stages

Enhanced Safety

Real time loading imbalance detection and intelligent lid locking monitoring, immediate shutdown protection in case of imbalance or lid opening

Adopting $\Phi 80$ mm adjustable feet for more stable installation

Multiple alarm including abnormal voltage alarm, high temperature alarm, overspeed alarm, load imbalance alarm, rotor absent alarm, brake abnormal alarm, rotor life reminder alarm, and other alarm functions

Fully covered steel plate protective sleeve and 12mm steel shell

Floor-Standing Large-Capacity
Refrigerated Centrifuge

LX-100L1000R

NEW

LX-100L1000R

Floor-Standing Large-Capacity Refrigerated Centrifuge

Scope of Application

Haier Biomedical LX-100L1000R is a conventional centrifuge designed for biopharmaceuticals with large capacity 6L, which is widely used in fields such as biopharmaceuticals and academic research. It plays an important role in the processes of protein collection, separation, and purification for samples like macromolecular proteins and bacteria.

Product Features

Satisfy the changing application requirements that extend from academic research to production facilities. Offer up to 18,590 x g of centrifugal force and a maximum capacity of 6 liters

Automatic radio-frequency rotor identification (RFID) that enables immediate identification of a rotor once it is securely placed in the centrifuge chamber, avoid over-speed, reduce error messages, and enhance the safety

Optimized multi-layer shock absorption technology makes the sound level ≤ 63 (dB (A))

Low center of gravity design, amplitude less than 0.02mm, ensuring stable operation and good centrifugal effect

Product Parts

Dual self-lock design to ensure safe operation

Dual gas springs with safety protection

4 universal casters and 4 levelling feet allows for easy movement and locks safely into place

316 stainless steel centrifuge chamber is rust-free and easy to clean

USB port for exporting operation record including speed, time and temperature, operation curve with alarm messages etc

Triple-layer construction to ensure safe use

Emergency lid release, pry out the white plastic plug on the side plate with a tool and pull the attached release cord to open the lid

Extensive Rotor Portfolio

Offering 6*1000ml, 6*500ml fixed-angle rotor with carbon fiber/aluminum alloy for option, and a variety of adapters available, which can accommodate tubes and bottles from 1.5 ml to 1 L

- The high-efficiency carbon fiber rotor achieves the maximum centrifugal force, faster acceleration and deceleration times, and greatly improves centrifugal efficiency
- Corrosion resistance and high strength can ensure the security and durability of the rotor
- The service life can reach up to 15 years

- High-strength, aero-aluminum rotor, which is acid and alkali corrosion-resistant, greatly increases the service life
- A comprehensive adapter portfolio, which is compatible with 500ml, 250ml, 100ml, 50ml, 15ml, 10ml, 5ml tubes and bottles
- The safe usage times can reach up to 50,000

Intuitive Interface

The 7-inch 45° glove-friendly touchscreen, the wide viewing angle more comfortable and practical for users of all heights

Easily monitor the display of set and actual run conditions with enlarged track bar during the run for clear visibility, which ensures the operator can see them from a distance

The speed, centrifugal force, time and temperature can be changed by user during the centrifugation process

Further enhanced with access controls such as user login with password protection, the independent program data of each user is managed separately

Quick recall of up to 1000+ programs with alpha-numeric naming to minimize time between runs and for quick run start by routine users

11 acceleration + 12 deceleration stages

The interface displays the following information and controls:

- Progress bar:** A horizontal bar at the top showing the current stage (11) and remaining time (11).
- Target speed/centrifugal force and real-time speed display:** Shows 0 RPM and 3000 RPM/RCF.
- Temperature set-point and real-time temperature display:** Shows 0°C and 4°C.
- Quick access to stored programs:** A list of programs (PREP1, PREP2) and a 'More' button for 1000+ program storage.
- Clear one-touch buttons:** Buttons for fast refrigeration (snowflake), fast centrifugation (right arrow), intelligent start-stop (play), and lid-opening (lid icon).

Enhanced Safety

Real time loading imbalance detection and intelligent lid locking monitoring, immediate shutdown protection in case of imbalance or lid opening

Multiple alarms including abnormal voltage alarm, high temperature alarm, overspeed alarm, load imbalance alarm, rotor absent alarm, brake abnormal alarm, rotor life reminder alarm, and other alarm functions

Adopting $\Phi 80$ mm adjustable foot for more stable installation

Fully covered steel plate protective sleeve and 12mm steel shell

Use of brushless induction motors to provide maintenance-free operation, eliminating carbon particle emissions

Technical Data

Model	LX-100L1000R
Max Capacity	6*1000ml
Speed Range (rpm)	500-10,000
Max RCF (xg)	18,590
Speed Accuracy (rpm)	± 10
Time Setting Range	1min-99h59m59s (1-second increment)
Precooling Function	Yes
Temperature Setting Range (°C)	-20-40, adjustable to 1
Display	7 inch touch screen
Noise (dB (A))	≤ 63
Power Supply (V/Hz)	400V 3N-50/60
Power (W)	8800
Exterior Dimensions (W*D*H) (mm)	740*920*990
Lid Opening Height (mm)	1720
Net Weight (kg)	380
Packing Dimensions (W*D*H) (mm)	940*1150*1270
Gross Weight (kg)	475
Certification	CE

Laboratory centrifuges contain fluorinated greenhouse gases in the sealing equipment.

**Benchtop General-Purpose
Refrigerated Centrifuge**

LX-155T750R

Benchtop General-Purpose Refrigerated Centrifuge

LX-155T750R

Scope of Application

It is a high-performance benchtop refrigerated centrifuge engineered for medium- to high-throughput workflows, offering exceptional versatility with support for tube sizes ranging from 0.2 mL microtubes to 750 mL bottles. Ideal for a wide range of applications including cell culture processing, protein purification, and clinical sample preparation.

It also serves as IVD laboratory equipment when used with IVD tubes and diagnostic analysis systems, separating human blood for hematological, immunological, and cardiovascular diagnostic tests.

Product Features

Offering a broad portfolio of fixed-angle and swing-out rotors, which can accommodate tubes and bottles from 1.5 ml to 750 ml, as well as deep-well plates

High-efficiency centrifugation delivers a remarkable 98% sample yield and reaches max speed in just 45 seconds

Rapid cooling and precise temperature control maximize productivity by significantly reducing experimental time

Optimized sound design for low noise levels ($\leq 59\text{dB(A)}$)

Use of brushless induction motors to provide maintenance-free operation, eliminating carbon particle emissions

RFID rotor identification locks the maximum speed to prevent overspeed operation

Intuitive Interface

- The 7-inch glove-friendly touchscreen, combined with a wide viewing angle, makes operation more comfortable and practical for users of all heights
- Equipped with user login and password protection, ensuring individualized program data management for each user
- Quick recall feature for over 1000+ programs, minimizing time between runs and facilitating quick starts for routine users
- The speed, centrifugal force, time, and temperature can be adjusted by the user during centrifugation
- 11 acceleration + 12 deceleration stages

Product Parts

Intelligent lid locking monitoring and dual automatic self-locking to ensure safe operation

Dual gas spring design for safe and effort-saving door opening

Drainage tray is designed to prevent internal water accumulation and enhance corrosion resistance

316 stainless steel centrifuge chamber is rust-free and easy to clean

Triple-layer construction to ensure safe use

USB port enables easy export of operation records, such as speed, time, temperature, operation curves, and alarm messages.

Key Features of Quick-Flip Biocontainment Safety Lids

- Quick-Flip Hinge Design**

Our hinged lids do not need to be removed from the rotor. Just a quick flip gives you fast access to your samples

- Low-Pressure Closing Clip**

The simple low-pressure clip offers a secure closure with an audible "click" and visual cues, enhancing safety and replacing multi-turn screw caps or complex lever systems

- Ambidextrous & Glove-Friendly**

Designed for ease of use, our lids can be operated with either hand and are glove-friendly, ensuring seamless operation

- Premium Polymer Construction**

Made from Polyetherimide (PEI), our lids provide excellent chemical resistance, transparency, and durability

- Certified Safety and Reliability**

Independently tested and certified per IEC-61010 Section 2-020 Annex AA, ensuring top-level safety and performance

Choose our Quick-Flip biocontainment safety lids for innovative, safe, and durable lab solutions.

Benchtop General-Purpose
Refrigerated Centrifuge

LX-155T500R

Benchtop General-Purpose Refrigerated Centrifuge

Scope of Application

LX-155T500R

It is widely used in fields such as life sciences, biology, medical research, pharmaceuticals, geology, agriculture and forestry, petrochemicals, light industry, and metal particles, for rapid separation and extraction of trace samples.

It also serves as IVD laboratory equipment when used with IVD tubes and diagnostic analysis systems, separating human blood for hematological, immunological, and cardiovascular diagnostic tests.

Product Features

Short pre-cooling time and precise temperature control performance

Optimized sound design for low noise levels ($\leq 55\text{dB(A)}$)

Wide range of rotors for application flexibility, compatible with tubes/bottles from 0.2 ml to 500ml

Automatic radio-frequency rotor identification (RFID) with over speed protection

Use of brushless induction motors to provide maintenance-free operation, eliminating carbon particle emissions

Real time loading imbalance detection, immediate shutdown protection in case of imbalance

ECO shut-off function reduce energy consumption and extend compressor life

Each rotor use frequency monitoring to guarantee maximum operational safety

 **Intuitive Interface**

9 acceleration+ 10 deceleration stages

Equipped with user login and password protection,ensuring individualized program data management for each user

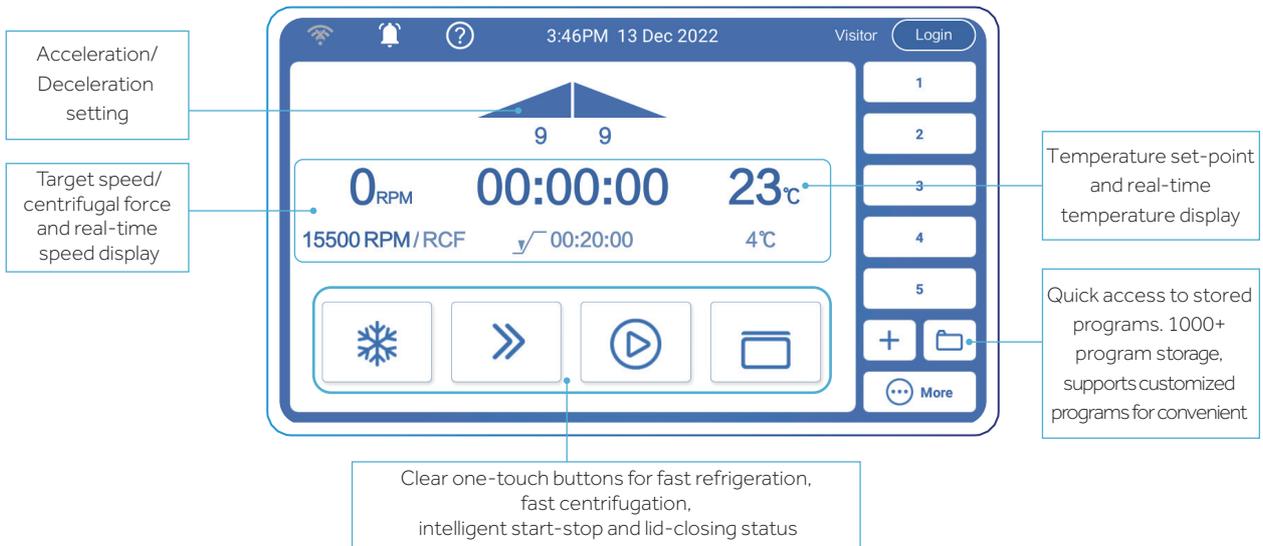

Quick recall feature for over 1000+ programs,minimizing time between runs and facilitating quick starts for routine users

The speed, centrifugal force, time and temperature can be changed by user during the centrifugation process

The 7-inch 45°glove-friendly touchscreen,the wide viewing angle more comfortable and practical for users of all heights

Product Parts

Intelligent lid locking monitoring and automatic self-locking to ensure safe operation

Dual gas spring design for safe and effort-saving door opening

Drainage tray to prevent internal water accumulation and improve corrosion resistance

Triple-layer construction to ensure safe use

316 stainless steel centrifuge chamber is rust-free and easy to clean

Emergency lid release, pry out the white plastic plug on the side plate with a tool and pull the attached release cord at least 7 times to open the lid

USB port for exporting operation record including speed, time and temperature, operation curve with alarm messages etc

Key Features of Quick-Flip Biocontainment Safety Lids

- ⊙ **Quick-Flip Hinge Design**
Our hinged lids do not need to be removed from the rotor. Just a quick flip gives you fast access to your samples
- ⊙ **Low-Pressure Closing Clip**
The simple low-pressure clip offers a secure closure with an audible "click" and visual cues, enhancing safety and replacing multi-turn screw caps or complex lever systems
- ⊙ **Ambidextrous & Glove-Friendly**
Designed for ease of use, our lids can be operated with either hand and are glove-friendly, ensuring seamless operation
- ⊙ **Premium Polymer Construction**
Made from Polyetherimide (PEI), our lids provide excellent chemical resistance, transparency, and durability
- ⊙ **Certified Safety and Reliability**
Independently tested and certified per IEC-61010 Section 2-020 Annex AA, ensuring top-level safety and performance

Choose our Quick-Flip biocontainment safety lids for innovative, safe, and durable lab solutions

**Benchtop Low-Speed
Refrigerated Centrifuge**

LX-60T750R

Benchtop Low-Speed Refrigerated Centrifuge

LX-60T750R

Scope of Application

With a variety of large-capacity rotors, it can meet the needs of clinical biochemistry, molecular biology, cell culture and other large-throughput sample processing, and is widely used in medical, scientific research, pharmaceutical and other fields.

It also serves as IVD laboratory equipment when used with IVD tubes and diagnostic analysis systems, separating human blood for hematological, immunological, and cardiovascular diagnostic tests.

Product Features

Short pre-cooling time and precise temperature control performance

Wide range of rotors for application flexibility, compatible with tubes/bottles from 0.2 ml to 750ml

Use of brushless induction motors to provide maintenance-free operation, eliminating carbon particle emissions

Optimized sound design for low noise levels($\leq 63\text{dB(A)}$)

Automatic rotor identification and rotor life monitoring for maximum operational safety

Real time loading imbalance detection, immediate shutdown protection in case of imbalance

Only 35 seconds to rise to the maximum speed under full load of 4*750ml

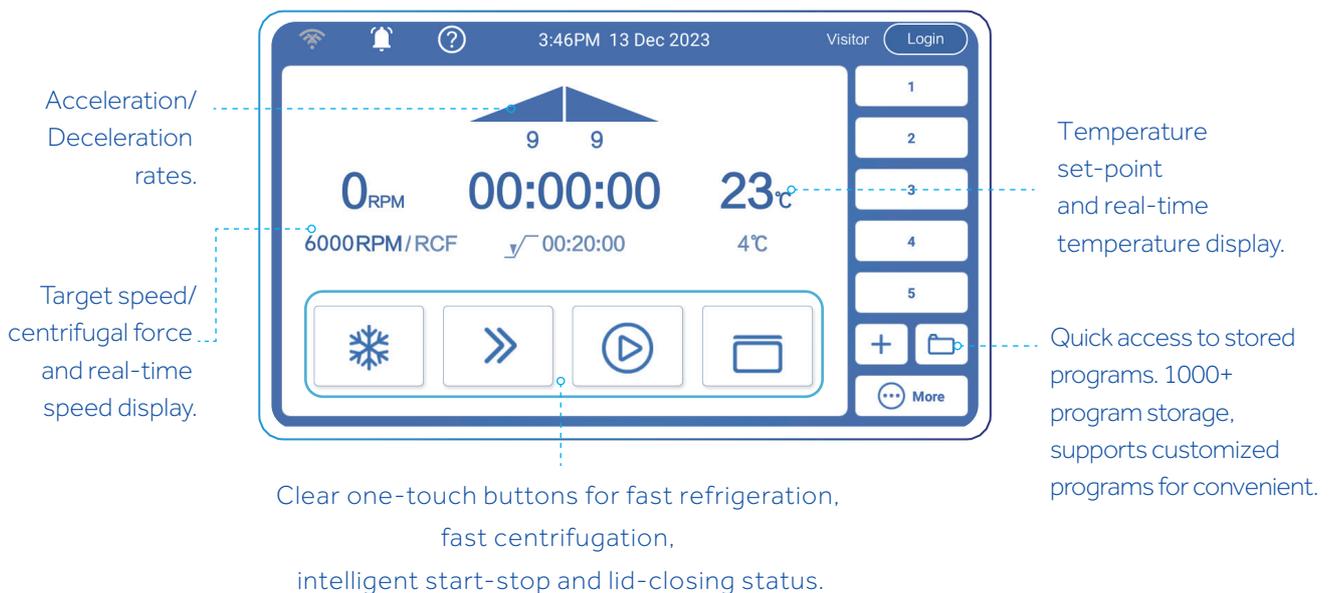

Low center of gravity design, amplitude less than 0.06mm, ensuring stable operation and good centrifugal effect

Intuitive Interface

- The 7-inch 45 ° glove-friendly touchscreen, the wide viewing angle more comfortable and practical for users of all heights
- Further enhanced with access controls such as user login with password protection, the independent program data of each user is managed separately
- Quick recall of up to 1000+ programs with alpha-numeric naming to minimize time between runs and for quick run start by routine users
- The speed, centrifugal force, time and temperature can be changed by user during the centrifugation process
- 9 acceleration + 10 deceleration stages

Product Parts

Intelligent lid locking monitoring and dual automatic self-locking to ensure safe operation

Dual gas springs with safety protection

Drainage tray to prevent internal water accumulation and improve corrosion resistance

Triple-layer construction to ensure safe use

316 stainless steel centrifuge chamber is rust-free and easy to clean

USB port for exporting operation record including speed, time and temperature, operation curve with alarm messages etc

**Benchtop High-Speed
Refrigerated Centrifuge**

LX-185T100R

Benchtop High-Speed Refrigerated Centrifuge

LX-185T100R

Scope of Application

It is widely used in fields such as life sciences, biology, medical research, pharmaceuticals, geology, agriculture and forestry, petrochemicals, light industry, and metal particles, for rapid separation and extraction of trace samples.

It also serves as IVD laboratory equipment when used with IVD tubes and diagnostic analysis systems, separating human blood for hematological, immunological, and cardiovascular diagnostic tests.

Product Features

Wide range of rotors for application flexibility, compatible with tubes/bottles from 0.2 ml to 100ml

Short pre-cooling time and precise temperature control performance

Fast sample processing at maximum speeds of up to 18,500 rpm (30,130xg)

Use of brushless induction motors to provide maintenance-free operation, eliminating carbon particle emissions

Optimized sound design for low noise levels (≤ 52 dB(A))

Automatic radio-frequency rotor identification (RFID) with over speed protection

Each rotor use frequency monitoring to guarantee maximum operational safety

Real time loading imbalance detection, immediate shutdown protection in case of imbalance

Intuitive Interface

The 7-inch 45 ° glove-friendly touchscreen, the wide viewing angle more comfortable and practical for users of all heights

Further enhanced with access controls such as user login with password protection, the independent program data of each user is managed separately

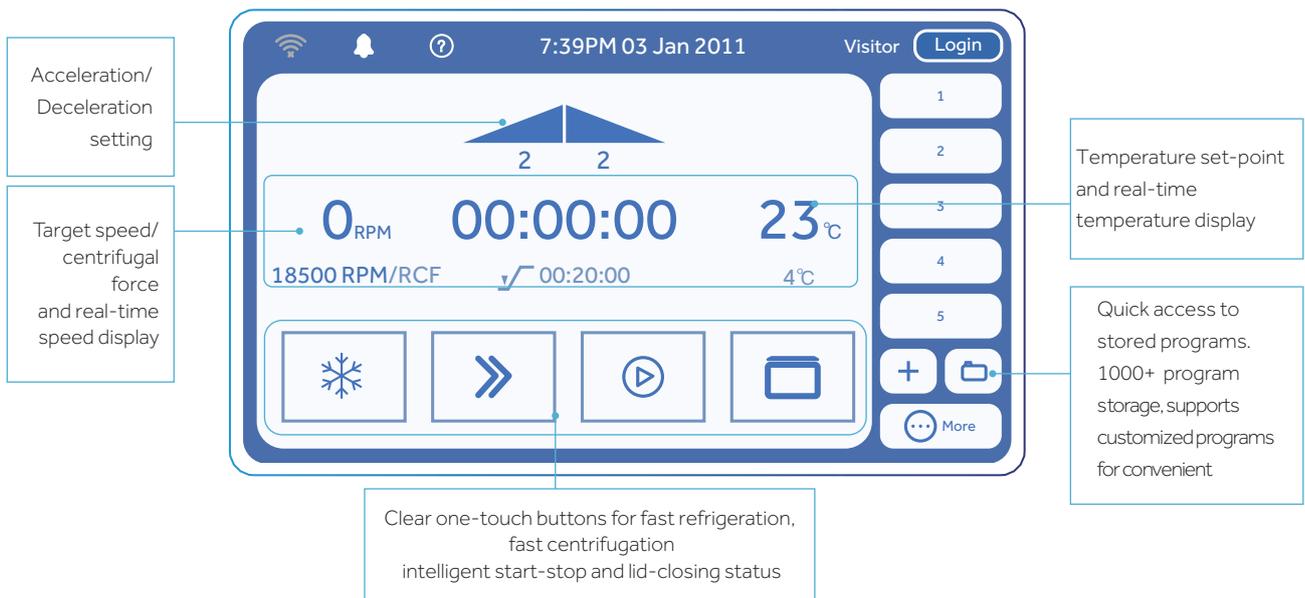

Quick recall of up to 1000+ programs with alpha-numeric naming to minimize time between runs and for quick run start by routine users

The speed, centrifugal force, time and temperature can be changed by user during the centrifugation process

9 acceleration + 10 deceleration stages

Product Parts

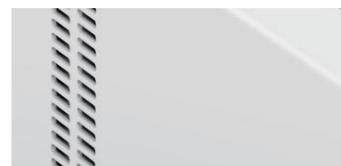

Intelligent lid locking monitoring and automatic self-locking to ensure safe operation

Gas springs with safety protection

Drainage tray to prevent internal water accumulation and improve corrosion resistance

Triple-layer construction to ensure safe use

316 stainless steel centrifuge chamber is rust-free and easy to clean

Emergency lid release, pry out the white plastic plug on the side plate with a tool and pull the attached release cord at least 7 times to open the lid

USB port for exporting operation record including speed, time and temperature, operation curve with alarm messages etc.

**Benchtop High-Speed
Centrifuge**

LX-185T100-J

Benchtop High-Speed Centrifuge

LX-185T100-J

Scope of Application

Mainly applied to the experimental processes of collecting, separating, and purifying samples such as cells, macromolecular proteins, body fluids, DNA/RNA, plasmids, and viruses. Widely used in universities, third party testing organizations, disease prevention, medical and health, biological pharmaceutical and other related fields.

It also serves as IVD laboratory equipment when used with IVD tubes and diagnostic analysis systems, separating human blood for hematological, immunological, and cardiovascular diagnostic tests.

Product Features

Wide range of rotors for application flexibility, compatible with tubes/bottles from 0.2 ml to 100ml

Optimized sound design for low noise levels ($\leq 63\text{dB(A)}$)

Fast sample processing at maximum speeds of up to 18,500 rpm (30,130 xg)

Automatic rotor identification locks the maximum rotational speed to prevent overspeed operation

Use of brushless induction motors to provide maintenance-free operation, eliminating carbon particle emissions

Real time loading imbalance detection, immediate shutdown protection in case of imbalance

Intuitive Interface

LCD keypad and control knob for easy operation, the wide viewing angle more comfortable and practical for users of all heights

9 acceleration + 10 deceleration stages

Quick recall of up to 99 programs for quick run start by routine users

The speed, centrifugal force, and time can be changed during the centrifugation process

Target speed/centrifugal force/time and real-time operation data display

Screen lock function to prevent press errors

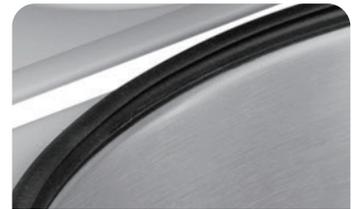

One key to recall stored programs for more convenient operation

Acceleration/Deceleration rates

Patented anti-seismic door lock. In case of abnormal vibration, the cover can be locked reliably.

Triple-layer construction to ensure safe use.

Unique air duct structure design, the heat inside the centrifugal chamber can dissipate quickly.

316 stainless steel centrifuge chamber is rust-free and easy to clean.

Dual gas springs for easy door opening and with safety protection.

Emergency lid release, pry out the white plastic plug on the side plate with a tool and pull the attached release cord to open the lid.

Benchtop Low-Speed Centrifuge

Scope of Application

LX-60T100-J

It is widely used in fields such as life sciences, biology, medical research, pharmaceuticals, geology, agriculture and forestry, petrochemicals, light industry, and metal particles, for rapid separation and extraction of trace samples.

It also serves as IVD laboratory equipment when used with IVD tubes and diagnostic analysis systems, separating human blood for hematological, immunological, and cardiovascular diagnostic tests.

Product Features

Offer a compact footprint and compatible with 5ml, 10ml, 15ml, 50ml or 100ml sample tube, small and large blood collection tubes

Use of brushless induction motors to provide maintenance-free operation, eliminating carbon particle emissions

Optimized sound design for low noise levels ($\leq 56\text{dB(A)}$)

Automatic rotor identification with over speed protection

Real time loading imbalance detection, immediate shutdown protection in case of imbalance

Intuitive Interface

LCD keypad and control knob for easy operation, the wide viewing angle more comfortable and practical for users of all heights

Quick recall of up to 99 programs for quick run start by routine users

Patented anti-seismic door lock. In case of abnormal vibration, the cover can be locked reliably

Unique air duct structure design, the heat inside the centrifugal chamber can dissipate quickly

Gas springs with safety protection

316 stainless steel centrifuge chamber is rust-free and easy to clean

Triple-layer construction to ensure safe use

Emergency lid release, pry out the white plastic plug on the side plate with a tool and pull the attached release cord to open the lid

Compact Hydrocarbon-Cooled Centrifuge

LX-60T100R

LX-60T100R

Compact Hydrocarbon-Cooled Centrifuge

Scope of Application

The LX-60T100R is Haier Biomedical's first centrifuge with pioneering hydrocarbon cooling technology, advancing sustainability without compromising performance. Its versatility makes it ideal for a broad range of applications in clinical, research, and industrial laboratories.

It also serves as IVD laboratory equipment when used with IVD tubes and diagnostic analysis systems, separating human blood for hematological, immunological, and cardiovascular diagnostic tests.

Product Features

Adopts natural refrigerant (R290) to ensure optimal cooling performance while minimizing environmental impact

High versatility with 6 different rotor options that cover a wide range of tubes from 0.2 ml to 100ml

Equipped with dual inverter cooling and multiple shock absorption systems, it maintains a sound level below 32dB(A) even at maximum speed

Real time loading imbalance detection, immediate shutdown protection in case of imbalance

RFID rotor identification locks the maximum speed to prevent overspeed operation

Delivers rapid pre-cooling performance, going from room temperature to 4°C in a mere 5 minutes

Intuitive Interface

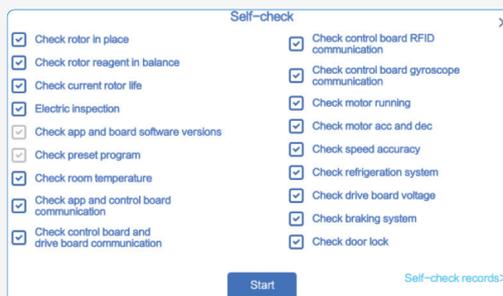

- The 7-inch glove-friendly touchscreen, combined with a wide viewing angle, makes operation more comfortable and practical for users of all heights
- Equipped with user login and password protection, ensuring individualized program data management for each user
- Quick recall feature for over 1000+ programs, minimizing time between runs and facilitating quick starts for routine users
- The speed, centrifugal force, time, and temperature can be adjusted by the user during centrifugation
- 9 acceleration + 10 deceleration stages

Enables simultaneous viewing of setpoints and actual operating conditions

Fast program setup delivers an intuitive view and hassle-free operation

Self-check function to ensure the centrifuge has reached operational status

Electronic level assists in installation and leveling, making installation easier and simpler

Product Parts

Intelligent lid locking monitoring and automatic self-locking to ensure safe operation

Gas spring design for safe and effort-saving door opening

Drainage tray is designed to prevent internal water accumulation

316 stainless steel centrifuge chamber is rust-free and easy to clean

Low center-of-gravity design, amplitude under 0.015 mm, ensuring smooth operation and highly efficient centrifugation

USB port enables easy export of operation records, such as speed, time, temperature, operation curves, and alarm messages

**Benchtop High-Speed
Refrigerated Microcentrifuge**

LX-165T2R

Benchtop High-Speed Refrigerated Microcentrifuge

Scope of Application

LX-165T2R

It is widely used in fields such as life sciences, biology, medical research, pharmaceuticals, geology, agriculture and forestry, petrochemicals, light industry, and metal particles, for rapid separation and extraction of trace samples.

It also serves as IVD laboratory equipment when used with IVD tubes and diagnostic analysis systems, separating human blood for hematological, immunological, and cardiovascular diagnostic tests.

Product Features

Short pre-cooling time of only 5 minutes from room temperature to 4°C

Fast sample processing at maximum speeds of up to 16,500 rpm (25,872 x g)

Precise temperature and centrifugal speed control ensures optimal separation results

Use of brushless induction motors to provide maintenance-free operation, eliminating carbon particle emissions

Optimized sound design for low noise levels (≤ 52 dB(A))

Real time loading imbalance detection, immediate shutdown protection in case of imbalance

Automatic radio-frequency rotor identification (RFID) and rotor life monitoring for maximum operational safety

Intuitive Interface

The 7-inch 45° glove-friendly touchscreen, the wide viewing angle more comfortable and practical for users of all heights

Further enhanced with access controls such as user login with password protection, the independent program data of each user is managed separately

Quick recall of up to 1000+ programs with alpha-numeric naming to minimize time between runs and for quick run start by routine users

The speed, centrifugal force, time and temperature can be changed by user during the centrifugation process

2 acceleration + 3 deceleration stages

 **Product Parts**

Intelligent lid locking monitoring and automatic self-locking to ensure safe operation

Viewing port in the lid for observing the operating condition of the rotor

Drainage tray to prevent internal water accumulation and improve corrosion resistance

Triple-layer construction to ensure safe use

316 stainless steel centrifuge chamber is rust-free and easy to clean

Emergency lid release, pry out the white plastic plug on the side plate with a tool and pull the attached release cord at least 7 times to open the lid

USB port for exporting operation record including speed, time and temperature, operation curve with alarm messages etc.

Benchtop High-Speed Microcentrifuge

LX-165T2-J

Benchtop High-Speed Microcentrifuge

Scope of Application

LX-165T2-J

It is widely used in fields such as life sciences, biology, medical research, pharmaceuticals, geology, agriculture and forestry, petrochemicals, light industry, and metal particles, for rapid separation and extraction of trace samples. It also serves as IVD laboratory equipment when used with IVD tubes and diagnostic analysis systems, separating human blood for hematological, immunological, and cardiovascular diagnostic tests.

Product Features

Fast sample processing at maximum speeds of up to 16,500rpm (25,872xg)

Compact footprint with a wide array of microcentrifuge tubes from 0.2 to 5 ml

Use of brushless induction motors to provide maintenance-free operation, eliminating carbon particle emissions

Automatic rotor identification with over speed protection

Optimized sound design for low noise levels ($\leq 58\text{dB(A)}$)

Real time loading imbalance detection, immediate shutdown protection in case of imbalance

Intuitive Interface

LCD keypad and control knob for easy operation, the wide viewing angle more comfortable and practical for users of all heights

Quick recall of up to 99 programs for quick run start by routine users

2 acceleration + 3 deceleration stages

The speed, centrifugal force, and time can be changed during the centrifugation process

Target speed/centrifugal force/time and real-time operation data display

Screen lock function to prevent press errors

One key to recall stored programs for more convenient operation

Acceleration/Deceleration rates

Product Parts

Patented anti-seismic door lock. In case of abnormal vibration, the cover can be locked reliably

Unique air duct structure design, the heat inside the centrifuge chamber can dissipate quickly

Triple-layer construction to ensure safe use

316 stainless steel centrifuge chamber is rust-free and easy to clean

Emergency lid release, pry out the white plastic plug on the side plate with a tool and pull the attached release cord to open the lid

Mini-Centrifuge

LX-120T2Z/50T2Z

Mini-Centrifuge

LX-120T2Z / 50T2Z

Scope of Application

This product is used in micro centrifugal scenarios (single tube capacity is less than or equal to 2ml)

Product Advantages

LX-120T2Z

LX-50T2Z

Quiet

Suspension with shock absorber reduces noise output

Convenient

Simple and fast operation

Small

Can be held in your hand

Safe

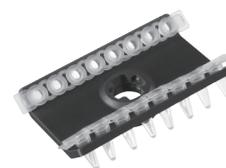

- Safety interlock lid with automatic shut-off if lid is open
- Anti vibration & absorption suction cup
- Splash and leak protection

PCR tubes	211001	0.2	Clear	single tube, thin-wall, flat cap	500pcs/bag, 2 bags/box, 10 boxes/case
PCR 8-strip tubes	222002	0.1	Clear	8-strip tube, flat cap	125 sets/bag, 10 bags/case
	222003	0.1	White	8-strip tube, flat cap	125 sets/bag, 10 bags/case
	292004	0.1	Clear	8-strip tube--type B, flat cap	125 sets/bag, 10 bags/case
	292005	0.1	White	8-strip tube--type B, flat cap	125 sets/bag, 10 bags/case
	292006	0.2	Clear	8-strip tube--type B, flat cap	125 sets/bag, 10 bags/case
	292007	0.2	White	8-strip tube--type B, flat cap	125 sets/bag, 10 bags/case
	222008	0.2	Clear	8-strip tube, flat cap	125 sets/bag, 10 bags/case
	272009	0.2	Clear	8-strip tube, convex cap	125 sets/bag, 10 bags/case

 PCR Plate

The PCR series products(Polymerase Chain Reaction, PCR) are mainly used as primers, Taq DNA polymerase, dNTP, template nucleic acid, Mg, buffer, and other carriers involved ,They are widely used in genetics, biochemistry, immunity, medicine, and other fields. They are not only used in basic research such as gene isolation, cloning, and nucleic acid sequence analysis, but also in disease diagnosis or anywhere with DNA or RNA.

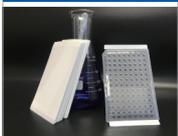

PCR are used in batch samples to meet different user needs and have wide applicability, making them suitable for different automation applications.

CAT.NO.	Volume (mL)	Type	Color	Sterile	Packing
232024	0.2	No Skirt	Clear	×	10pcs/box, 5boxes/case
242025	0.2	Half Skirt	Clear	×	10pcs/box, 5boxes/case
242026	0.2	Half Skirt,Anti-static	Clear	×	10pcs/box, 5boxes/case
232029	0.1	No Skirt	Clear	×	10pcs/box, 5boxes/case
242030	0.1	Half Skirt	Clear	×	10pcs/box, 5boxes/case
242031	0.1	Half Skirt,Anti-static	Clear	×	10pcs/box, 5boxes/case
252032	0.1	Full Skirt	Clear	×	10pcs/box, 5boxes/case
252035	0.1	Full Skirt,H1	Clear+White	×	10pcs/box, 5boxes/case
252033	0.1	Full Skirt,Anti-static	Clear	×	10pcs/box, 5boxes/case

PCR Plate Seals

Product	CAT.NO.	Dimension	Temperature Range	Packing
	202034	140mm*80mm	-20°C-120°C	100pcs/box
